

Business / Products

Shevlin Pharma offers a diverse range of pharmaceutical products designed to meet various healthcare needs:

Active Pharmaceutical Ingredients (API)

High-Quality API Solutions for a Healthier World

At Shevlin Pharma, we specialize in the production and supply of high-quality Active Pharmaceutical Ingredients (APIs) that form the backbone of effective and safe medications. Our APIs are trusted by pharmaceutical companies worldwide for their purity, consistency, and compliance with international standards.

Our API Offerings

We provide a comprehensive range of APIs across various therapeutic categories, including but not limited to:

1. Cardiovascular
2. Anti-infectives
3. Central Nervous System (CNS)
4. Oncology
5. Anti-diabetics
6. Respiratory
7. Gastrointestinal

Partner with Shevlin Pharma

When you choose Shevlin Pharma as your API partner, you benefit from:

Global Reach: A robust global supply chain that ensures timely delivery of APIs.

Customer Support: Dedicated customer support to assist with technical queries and regulatory documentation.

Pharmaceutical Excipients

At Shevlin Pharma, we focus on few key products essential to numerous industries:

Enhancing Drug Formulations with Premium Excipients

At Shevlin Pharma, we provide a wide range of high-quality pharmaceutical excipients that are essential for the development of effective and stable drug formulations. Our excipients are meticulously crafted to ensure the highest levels of performance, safety, and consistency.

Our Excipients Portfolio

Shevlin Pharma offers an extensive range of excipients, including but not limited to:

- **Binders:** Enhance the binding properties of tablets.
- **Fillers/Diluents:** Provide bulk to formulations.
- **Disintegrants:** Ensure the tablet breaks down appropriately.
- **Lubricants:** Prevent ingredients from sticking during production.
- **Coating Agents:** Improve the appearance and mask the taste of tablets.
- **Preservatives:** Prevent microbial growth in formulations.
- **Stabilizers:** Maintain the stability of active ingredients.

High-Quality Lactose for Superior Drug Formulations

Shevlin Pharma is a trusted provider of high-quality pharmaceutical lactose, a versatile and widely used excipient in the pharmaceutical industry. Our lactose products are designed to meet the stringent requirements of modern drug formulations, ensuring safety, efficacy and satisfaction.

The global lactose market size was valued at USD 1.72 billion in 2023. The market is projected to grow from USD 1.02 billion in 2024 to USD 4.99 billion by 2032, exhibiting a CAGR of 22.0% during the forecast period.

it is widely used in infant formula manufacturing and filler/excipient in the pharmaceutical sector.

The growing pharmaceutical sector in developing countries, along with the increasing utilization of this ingredient in food processing and manufacturing of infant formula, is resulting in the growing demand in the global market.

Types of Lactose We Offer

Shevlin Pharma provides a variety of lactose grades tailored to meet specific formulation needs:

- **Monohydrate Lactose:** Commonly used in tablets and capsules, offering good flow properties and compressibility.
- **Anhydrous Lactose:** Ideal for moisture-sensitive formulations and direct compression processes.
- **Spray-Dried Lactose:** Provides excellent flowability and is suitable for direct compression.
- **Inhalation Grade Lactose:** Specifically designed for dry powder inhalers, ensuring uniform particle size and distribution.

Gelatin: Sourced from top-tier suppliers, our Gelatin is available in both bovine and porcine forms. It serves a range of applications, including pharmaceuticals, food, and cosmetics. Our Gelatin products are recognized for their superior quality and adherence to international safety standards.

Vitamins: Essential for health and wellness, our comprehensive range of vitamins caters to the dietary supplement and pharmaceutical sectors. We ensure that our vitamins meet stringent quality standards, providing the necessary nutrients to support health and vitality.

HPLC columns, analytical columns:

We Shevlin provide HPLC columns, analytical columns, ion exchange chromatography columns/packing materials for purification of biopharmaceuticals, and chiral chromatography columns/packing materials, which can separate a wide range of compounds.

Services: Information on any services you offer (e.g., contract manufacturing, R&D support)
